- Child Care Centers
- Shopping Centers
- Fitness Centers
- Hospitals
- Offices
- Manufacturing Plants
- Airplanes & Airports

## REDUCE CHEMICAL CONSUMPTION

---

The Pax-100 has been engineered to dispense the least amount of chemicals while ensuring maximum coverage by atomising the disinfectant particles to a fine 70 microns.

We use the highest quality industrial grade nozzles to prevent clogging and to permit a comfortable spray distance of 36" to 48".

## UNINTERRUPTED 8-HOUR RUN TIME

---

We have designed a powerful battery to maximize run time and to reduce the need to charge frequently.

The internal battery also eliminates the need to purchase and carry around additional external batteries and any external cumbersome charging docks and cables.

## HEALTH CANADA APPROVED DISINFECTANTS

---

The Pax-100 works with all water soluble disinfectants listed by Health Canada and proven as being effective in infection control and elimination of viruses and bacteria. You have the flexibility of choosing which disinfectant to use for your intended application as long as the disinfectant is water soluble and you will save up to 80% on disinfectant costs.

## COVERAGE & SPEED

---

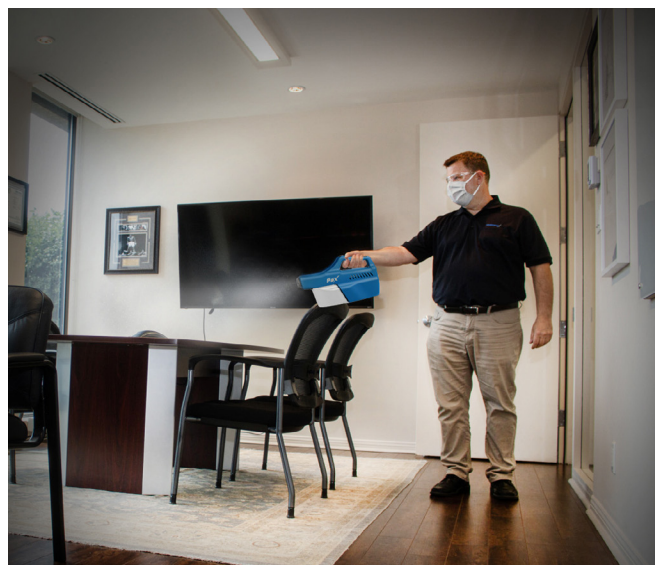

The PAX-100 Handheld Electrostatic Sprayer covers up to 6,000 square feet with a single tank.

Disinfect an average sized room with the PAX-100 handheld electrostatic sprayer in under a minute.

## MADE IN CANADA

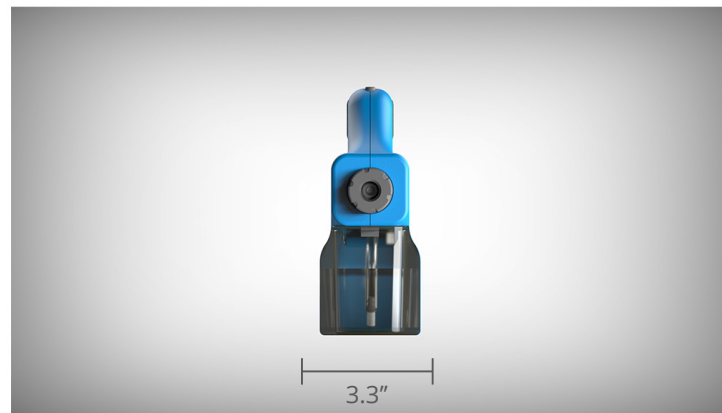

---

The PAX-100 handheld electrostatic sprayer is proudly designed, engineered and manufactured in Canada.
